# **SMD Crystal Oscillator**

## FEATURES

- AT-cut crystal oscillator / frequency range 1 ~ 80 MHz.
- 1.6 × 1.2 × 0.7 mm Max. / 4.1 mg (the smallest package in its class).
- Frequency tolerance ±7 ppm available.
- · Ceramic with metal lid sealed by patented Electron-Beam-Soldering.

#### APPLICATIONS

• Mobile communication, wireless-modules.

\*2 Measured on "Wave Crest 3100C"

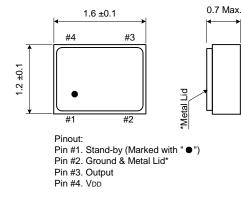

• The codes for the Ordering Number are indicated in blue, and the specifications are described in black.

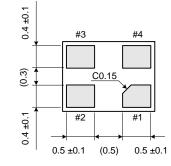

• Not all combinations of options are available as standard.

• For specifications that include "Overall Frequency-Tolerance", please select "N" for the (4) Frequency Tolerance and let us know your specific requirements.

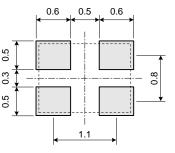

• For specifications other than those above, please contact our sales / website and let us know your specific requirements.

#### OUTLINE DEMENSIONS

#### LAND PATTERN

• For operational stability, a 0.01  $\mu F$  bypass capacitor should be placed between V\_DD (Pin #4) and GND (Pin #2) as close as possible to the product.
